NOTE FOR COUNCIL 4

SUBJECT: Estimate for Rs.43,700/- for Feeder Channel Road and Check Water Drain of the Koramangala Sewage Farm

---

In view of the scarcity of vegetables in Bangalore City, sanction was accorded as an emergent measure, to bring under cultivation fifty acres of land in the Koramangala tank bed A grant of Rs.40,000/- has been allotted for the purpose and the special officer for vegetable productio is actively engaged on the work.

In order to facilitate the work of the Special Officer in this direction and also to irrigate the atchkat of the tank of 180 acres, the Director of Public Health has submitted an estimate amounting to Rs.43,700/- which provides for the following works -

a) construction of a road from Bangalore-Hosur Road to the Farm Houses,

b) A check water drain for protecting the cultivated lands against evasion or inundation by rain water,

c) Feeder Channels for irrigating them

The estimate has been duly scrutinised by the Chief Engineer for Irrigation and it is proposed to sanction the same for Rs.43,700/-, the charge being met from the provision of Rupees five lakhs, made under Bangalore City Improvement Trust Board in the current year's State Budget.

The Dewan and the Minister for Revenue and Law agree The opinion of the other Ministers of Council is requested on the proposal to sanction the above estimate for 43,700/-

Final Note by the Minister for Revenue and Law.

Subject — Proposal to sanction an estimate amounting to Rs.43,700/- for the construction of Feeder Channel Road and Check Water Drain in the Koramangala Sewage Farm, Bangalore.

Consequent upon the acute scarcity of vegetables in Bangalore City, sanction was accorded, as an emergent measure, to bring under cultivation fifty acres of land in the Koramangala tank-bed A grant of Rs.40,000/- has been allotted for the purpose and the Special Officer for Vegetable Production, is actively engaged on the work.

In order to facilitate the work of the Special Officer and also to irrigate the Atchkat under the tank amounting to 180 acres, the Director of Public Health has submitted an estimate for Rs.43700/ which provides for the following items of work :-

(a) Construction of a road from the Bangalore - Hosur Road to the Farm Houses:

(b) A Check Water Drain for protecting the cultivated lands against erosion or inundation by rain water. and

(c) Feeder channels for irrigating them

The estimate has been duly scrutinised by the Chief Engineer for Irrigation, and it is proposed to sanction it for Rs 43,700/-, the charge being met from the provision of Rupees Five lakhs made under "Bangalore City Improvement Trust Board", in the current year's State Budget.

The Dewan and the other Ministers agree and I solicit the gracious sanction of His Highness to the proposal.

M. Venkatarao.

MINISTER FOR REVENUE & LAW.

23/3

Report on the Estimate for feeder channels, road and check water drain of the Koramangala Sewage Farm.

------@@@@@------

The Government have ordered conversion of 50 acres of the Koramangala tank bed into vegetable garden, and have sanctioned Rs.40,000 for the purpose. The Superintendent of the Gardens Department is actively engaged in the work.

In order to facilitate his work and also to irrigate the atchakat of the tank of 180 acres, an estimate costing Rs.43,700 is prepared, chargeable to I (26) having a provision of 3.6 lakhs of Rupees. It provides for the construction of a road from Bangalore-Hosur road to the Farm Houses, a check water drain for protecting the cultivated lands against erosion, or innundation by rain water, and feeder channels for irrigating them.

The proposals are shown on the accompanying Ozolid Print. The road is taken in a bank of 3 feet as the ground is moist, and is metalled to the full width of 15 feet with 4 inches of broken metal overlying 8 inches of macdam. The main feeder channel has a gradient of 1 in 1000 and a velocity of 2.1 ft. per second and its two branches, skirting the area of irrigation, have a gradient of 1 in 1750 and a velocity 1.43 ft. per second. The former can carry 8.2 cusecs and the latter 4.29 cusecs each, against a total discharge of 6 cusecs of sewage expected from the city. All the channels are pitched with stones 3 to 4 inches thick and grouted with cement mortor. When the purification plant is installed the main feeder will cease to function while the branches remain as necessary and serviceable as ever. Since they command not only the bed but also the atchkat, cultivators of Sunnkal Farm and its vicinity can forthwith be allotted lands in the atchkat and the area thus realeased formed into sites as has been contemplated
